Blogging for Educators/Education

How might blogging be used to increase communication within a school setting? How does this new means of collaboration and sharing across the web, impact teaching and learning?

Blogs can be used for student reflection, learning logs/journals, team projects, teacher/class web pages, professional development, and much more.

"If you can email, you can blog."

Wikipedia describes blogging (<http://en.wikipedia.org/wiki/Weblog>):

Many blogs provide commentary or news on a particular subject such as food, politics, or local news; others function as more personal online diaries. A typical blog combines text, images, and links to other blogs, web pages, and other media related to its topic. The ability for readers to leave comments in an interactive format is an important part of many blogs. Most blogs are primarily textual, although some focus on art (artlog), photographs (photoblog), sketchblog, videos (vlog), music (MP3 blog), audio (podcasting) or sexual topics (Adult blog), and are part of a wider network of social media. Micro-blogging is another type of blogging which consists of blogs with very short posts.

As of October 2007, blog search engine Technorati reports tracking 108.5 million blogs. (<http://technorati.com/about/>)

What is your experience with educational blogging?

- ☐ just testing the waters, curious
- ☐ recently started my own blogging journey
- ☐ starting today
- ☐ active blogger (self)
- ☐ active blogger with students

*"Blogging begins
with reading."
– Will Richardson*
